

 **ENTERPRISE
ARCHITECT**

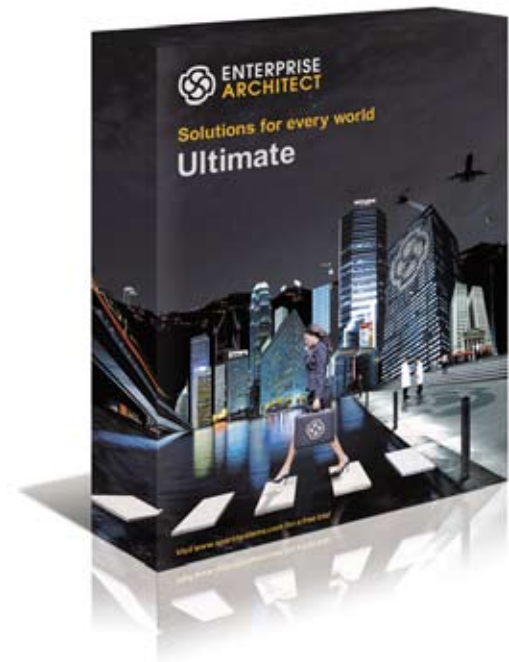

Version 8

**Visualize, document and
control your software project**

**Enterprise Architect 8 delivers
team based UML® 2.3 modeling
at an attractive price**

Enterprise Architect 8 is a high-performance, high-productivity visual modeling environment with comprehensive support for UML 2.3 and its related standards. As a scalable solution, Enterprise Architect is affordably priced for team-wide deployment.

Enterprise Architect is used by over half of the top 100 global firms. Over 200,000 licensed users worldwide are supported by 250+ consulting, technology and training partners in over 130 countries.

FEATURES:

- **Model** with all 14 UML 2.3 Diagrams

- **Forward** and **Reverse** Engineer Source Code and Databases

- Conduct **MDA**® (Model Driven Architecture) Style Transforms

- **Code Engineer** in C++, Java™, Visual Basic®.NET, C#, PHP, Delphi, Visual Basic, ActionScript® and Python®

- **Data Model** in SQL Server®, Oracle, MySQL®, DB2®, Sybase®, PostgreSQL and more

- **Streamline Projects** with Version Control, Security and Baselineing

- **Object Work Bench:** Edit, Test, Debug, Build, Run and Deploy all within EA

- **Built-in Discussion Forum:** Create posts, access discussions and threads for accelerated team communication

- **Custom Search Facility:** Perform detailed searches across the project; generate customized RTF/HTML reports from your results

- Comprehensive **XML Schema Modeling** and Import/Export for greater engineering functionality

- **WSDL Import/Export** for streamlined web services development

- **MOF™ Metamodeling** Import/Export including Netbeans™ MDR and Rational Rose®

- **Model Validation** on demand including rules support and OCL-based model validation

- **Archimate, BPMN™, OMG SysML™, SPEM** and **Business Rules** support

- **Strategic Modeling** technologies for Mind Mapping, Strategy Maps, Balanced Scorecard, Value Chain, Org Charts and more

- **Built-in scripting** to automate tasks and bring your models to life
